

# FILIPINO VERBS AND ASPECTS

## 1. THE FOCUS SYSTEM

Filipino verbs are "focused" on a specific part of the sentence. The focus determines which affix to use and which noun gets the Ang marker.

### A. Actor Focus (Subject Focus)

The subject (Ang phrase) is the doer of the action.

- Affixes: Mag-, Um-, Ma-, Mang-
- Example: Kumain si Juan ng mansanas. (Juan ate an apple.)
- Focus: Juan (the eater).

### B. Object Focus

The subject (Ang phrase) is the receiver of the action.

- Affixes: -in, i-, -an
- Example: Kinain ni Juan ang mansanas. (The apple was eaten by Juan.)
- Focus: Mansanas (the thing eaten).

## 2. ASPECTS OF THE VERB (TENSES)

Tagalog verbs don't have "tense" (time) in the strict sense, but "aspect" (state of completion).

1. Infinitive (Pawatas): The base form + affix (e.g., Magluto).
2. Completed (Perpektibo/Past): The action is done (e.g., Nagluto).
3. Uncompleted (Imperpektibo/Present): The action is currently happening or habitual (e.g., Nagluluto).
4. Contemplated (Kontemplatibo/Future): The action has not started yet (e.g., Magluluto).
